

AUTOMOTIVE DEALERS

ROSENFIELD DEALER DIAGNOSTICS
DealerAlignment

**ADVANCED FRAUD
 DETECTION & PREVENTION.**

With over 25 years in the Automotive Industry, we feel like we have seen it all. Over time, detecting and preventing fraud has become more complex and complicated. Our Dealer Services and Emerging Technology Teams have joined forces to develop DealerAlignment. Paying fake vendors? Service department taking a slice of the pie? DealerAlignment will dive into DMS data, and along with our experienced support team, will perform segregation of duties studies, accounting schedule assessments, analyses of income statements, review internally prepared bank reconciliations, studies on DMS Employee Access and Authorizations, and much more.
